SAKET RAJA

DATA SCIENTIST — MCA GRADUATE — AI & ANALYTICS SPECIALIST

saketraja.work@gmail.com • +91-8805705550 • Pune, India • github.com/saketraja • linkedin.com/in/saketraja26

PROFESSIONAL SUMMARY

Data Scientist and MCA graduate specializing in automated data pipelines, machine learning, vector embeddings, and natural language processing (NLP). Proficient in Python, statistical profiling, model evaluation, and building scalable AutoML and semantic search platforms. Experienced in end-to-end ML workflows, model serialization, and interactive deployment with REST APIs.

TECHNICAL SKILLS

Languages & Core: Python, SQL, C++, Java, JavaScript, TypeScript

Data Science & AI: AutoML, Supervised Learning, Vector Embeddings (BGE-M3), LLMs (LLaMA 3.2), Semantic Search, NLP

Frameworks & Libs: Scikit-Learn, Pandas, NumPy, SciPy, FastAPI, PyTorch, Node.js, REST APIs

Tools & Databases: Git, GitHub, MongoDB, Vercel, Figma, Adobe Illustrator, Photoshop

Core Concepts: Machine Learning Pipelines, Statistical Profiling, Anomaly Detection, Feature Engineering, DSA

KEY DATA SCIENCE PROJECTS

CypherCorp – Automated Machine Learning (AutoML) & Data Platform — 2026

Python, Scikit-Learn, Pandas, NumPy, SciPy, FastAPI, SQL, React

- Architected an end-to-end AutoML and EDA engine, automating data health scoring, statistical profiling, and model benchmarking.
- Developed an automated preprocessing pipeline for missing value imputation, categorical encoding, scaling, and multi-collinearity checks.
- Engineered a multi-model evaluation suite (Random Forest, Gradient Boosting, Ridge/Lasso) benchmarked on ROC-AUC, F1-Score, RMSE, and R^2.
- Implemented an IQR statistical anomaly module to identify distribution skewness, outliers, and feature correlations (Pearson/Spearman).
- Built a real-time model inference sandbox via FastAPI for serialized models (`joblib`), enabling interactive what-if predictions.
- Designed an AST-validated NL-to-SQL engine enabling non-technical users to extract analytical insights from tabular datasets.

AI Video Content Search & Q&A Pipeline — 2026

Python, BGE-M3, LLaMA 3.2, Semantic Search

- Architected an end-to-end Python data processing pipeline converting 18 educational videos into 6,900+ searchable transcript chunks.
- Generated high-dimensional dense vector embeddings using BGE-M3 (1024D) to enable sub-second semantic retrieval.
- Fine-tuned prompt retrieval strategies for LLaMA 3.2 to query vector indices and generate answers with exact timestamp citations.
- Engineered modular pipeline recovery, automated CI/CD integration, and comprehensive testing achieving 85%+ code coverage.

PROFESSIONAL EXPERIENCE

Design Head & Media Analytics Lead — 2023 – 2025

Venture Business Council — Pune, India

- Directed data-driven design strategies and visual communications across student communities in Pune.
- Tracked and analyzed user engagement metrics across digital promotional campaigns to optimize reach and audience conversion.

Freelance Graphic Designer — 2022 – Present

Self-Employed — Remote

- Delivered 50+ data-informed visual assets, branding elements, and marketing collateral based on target audience specifications.

EDUCATION

Master of Computer Applications (MCA)

MIT-WPU, Pune — Completed (2024 – 2026)

Final CGPA: 8.34 / 10.0

Specialization: Data Science, ML & System Design

Bachelor of Computer Applications (BCA)

Graduated — 2021 – 2024 — Final CGPA: 8.6 / 10.0

CERTIFICATIONS & LANGUAGES

Python Basics for Data Science (edX)

Google Advanced Data Analytics (Coursera)

Languages:

English, Hindi, Marathi, Gujarati
